

Key usage scenario

Purpose of this extension is translation of Base Application and System Application to Serbian Language. It does not contain, modify, or add any features to your Business Central environment.

Testing scenario:

1. Install "Serbian language (Serbia)" translation extension.
2. Log into Business Central.
3. Click on Settings icon in the upper right corner, choose "My Settings" and change language to: "Serbian (Latin, Serbia)".
4. After BC reload, click on Settings icon again. All items from drop down list should be in Serbian. Choose "Asistirano podešavanje"
5. Verify that all captions on this page are translated to Serbian, which confirms that Base and System Application are well translated. If opposite, please contact us.
